Applicant Robert Bosch GMBH						
TOOGH BOOM CIME!						
1. This opinion contains indications relating to the following items:    Box No. I   Basis of the opinion						
If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1 bis(b) that written opinions of this International Searching Authority will not be so considered.  If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.  For further options, see Form PCT/ISA/220.						
3. For further details, see notes to Form PCT/ISA/220.

## WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/EP2004/052027

Deal Magailable Copia

Вох	No. I	Basis of this opinion
1.		egard to the language, this opinion has been established on the basis of the international application in the language in it was filed, unless otherwise indicated under this item.  This opinion has been established on the basis of a translation from the original language into the following language , which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2.	claime	egard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the d invention, this opinion has been established on the basis of:  e of material  a sequence listing
	b. for	table(s) related to the sequence listing  mat of material  in written format  in computer readable form
	c. tim	contained in the international application as filed.  filed together with the international application in computer readable form.  furnished subsequently to this Authority for the purposes of search.
3.		In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4.	Additio	onal comments:

## WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/EP2004/052027

Box No.	II Priority									
1.	The following document has not yet been furnished:									
_	copy of the earlier application whose priority has been claimed (Rules 43bis.1 and 66.7(a)).									
	translation of the earlier application whose priority has been claimed (Rules 43 <i>bis</i> .1 and 66.7(b)).									
	Consequently it has not been possible to consider the validity of the priority claim. This opinion has nevertheless been established on the assumption that the relevant date is the claimed priority date.									
2.	This opinion has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rules 43bis.1 and 64.1). Thus for the purposes of this opinion, the international filing date indicated above is considered to be the relevant date.									
3. Addit	3. Additional observations, if necessary:

# WRITTEN REPORT OF THE INTERNATIONAL SEARCH AUTHORIT (ADDENDUM)

International Application No.
PCT/DE2004/052027

#### Item V

1. The present Report refers to the following documents:

D1: DE 42 37 721 A (ATLAS ELEKTRONIK GMBH) May 11, 1994

D2: DE 195 42 871 C (STN ATLAS ELEKTRONIK GMBH) November 28, 1996

D3: EP 0 940 792 A (STN ATLAS ELEKTRONIK GMBH) September 8, 1999

D4: US 4 604 738 A (AGGARWAL RAJ ET AL) August 5, 1986

2. Document D1 is regarded as the closest prior art. It discloses:

A method for classification, as defined by the preamble of Claim 1.

It also describes an increase in the value of the confidence parameter, by the fact that firstly a pre-recognition of the object to be classified is performed, which pre-recognition must be confirmed by a specific test criterion.

This can occur within a predefined time window.

The certainty, i.e. the confidence parameter, is thus raised, and the false alarm rate is lowered.

The Examiner is therefore of the opinion that the Claim is not at present correctly distinguished over the prior art in the two-part form, and recommends a rephrasing.

3. At least document D1 should be incorporated into the Description. The relevant prior art described therein should be clearly defined.

It should also be possible to deduce clearly, from the Description, which features of independent Claim 1 are not disclosed in D1. The object that is to be achieved in inventive fashion by way of these additional features should furthermore be deducible.
